

Working with MySQL Database Week: Todo List

1. Master - MySQL Database

By the end of this week, you should **MASTER** these topics:

- Database: meaning
- Main categories of databases: relational and NoSQL databases
- NoSQL database: how MongoDB stores data
- Working with databases using Node.js
 - ◆ HTTP verbs/methods (POST, GET, PUT, PATCH, and DELETE)
- SQL query: query vs programming languages
 - ◆ MySQL database
 - ◆ MySQL driver: as interface between MySQL database and Node
 - ◆ Connecting with MySQL Database using Node: steps
 - ◆ Most common SQL queries (CREATE, INSERT, SELECT, UPDATE, DELETE)
 - Using these SQL queries from Node to create, insert, select, update or delete tables

By the end of last week, you should have already watched the class videos on “**Working with databases (MySQL part I)**” and “**Working with databases (MySQL part II)**”. You should have also listed out all of your questions.

1.1. Start by working on MySQL practice questions (5 hrs)

- Instructions on how to complete the questions is found here:
 - [Link to homework](#)
- Try the homework on your own first and discuss it with your groupmates
- List out the parts you don't understand and ask your groupmates when you meet in groups

1.2. Complete the Working with Databases checklists (1 hr)

- [Link to working with databases checklist](#)
- Mark the ones you understood as complete, and list out the parts you didn't understand for further discussion

1.3. Before you meet your instructors in the group discussions

- Meet with your groupmates before the group sessions with Evangadi instructors. Please take the lead in sending out Zoom links and inviting everyone for discussion
- Try to discuss the questions you have with your groupmates

1.4. Attend the 2 group meeting sessions with your instructors (4 hrs)

- Discuss the remaining questions you have prepared
- Turn your camera on, share your screen and participate

2. Prepare for Next Week - Introduction to React and React Components (Functional Components)

2.1. Watch the “ Introduction to React” videos (3.5 hrs).

- DO NOT just watch the video. Make sure you are pausing the video and practicing on your computer
- Read the lecture note side by side
- Prepare your questions

2.2. Watch the “React Components (Functional Components)” videos (3.5hrs)

- DO NOT just watch the video. Make sure you are pausing the video and practicing on your computer
- Read the lecture note side by side
- Prepare your questions

2.3. Attend the “ Introduction to React” and “React Components (Functional Components)” (4hrs)

- Read the lecture note side by side
- Prepare to ask your questions
